

REPORT OF THE ACTIVITIES CONDUCTED IN THE MONTH OF APRIL'24

| SUBJECTS | CLASS-3 | CLASS-4 | CLASS-5 |
|----------|--|---|--|
| ENGLISH | <p>Activity- Scavenger Hunt for Topic Noun</p> <p>A scavenger hunt for the topic “nouns” is an engaging activity where children search for and collect items representing different nouns around their classroom or school. They could be given a list of categories like “person,” “place,” “thing,” and “animal,” and asked to find objects or pictures that match these categories. This fun, hands-on approach helps reinforce their understanding of nouns while encouraging teamwork and exploration.</p> <div style="text-align: center;">  </div> | <p>Activity- Noun Bingo</p> <p>Noun Bingo is a fun and educational activity designed to reinforce students' understanding of nouns and their different types. Here are the key objectives:</p> <p>Help students identify and differentiate between common nouns and proper nouns. Reinforce the concept of nouns as words that name people, places, things, and ideas. Expand students' vocabulary by exposing them to a variety of nouns. Encourage the use of diverse and specific nouns in their writing and speaking.</p> <div style="display: flex; justify-content: center; gap: 10px;"> <div style="text-align: center;">  </div> <div style="text-align: center;">  </div> </div> <p>2. Let’s talk about your favourite Person-To enhance their speaking skill we will conduct this amazing activity.</p> | <p>Choose the correct noun and make sentences</p> <div style="text-align: center;">  </div> <p>We all know about the importance of speaking skill, students are here to choose the noun to speak over that. It not only expands their vocabulary but also enhances their writing skill too.</p> <div style="text-align: center;">  </div> |

HINDI

गतिविधि -

*भारत देश में होने वाले विभिन्न प्रकार के नृत्य को पहचानना और उनके नाम लिखना ।

भारत के नक्शे पर विभिन्न राज्यों को चिह्नित किया गया

प्रत्येक राज्य के प्रसिद्ध नृत्य रूप को समझाया गया | इसके बाद विद्यार्थियों को समूहों में बाँटकर प्रत्येक समूह को एक राज्य का नृत्य रूप चुनने को कहा गया | प्रत्येक समूह द्वारा चुने गए नृत्य रूप की जानकारी और उसका प्रदर्शन तैयार किया गया | सभी समूह ने अपने प्रदर्शन और जानकारी कक्षा के सामने प्रस्तुत किए।

रचनात्मक गतिविधि -

*ऐसा वर दो प्रार्थना को याद करके कक्षा में हाव-भाव के साथ सुनाइए कविता वचन गतिविधि के द्वारा विद्यार्थियों ने प्रार्थना के महत्व को समझा एवं उनके वाचन कौशल का विकास हुआ।

रचनात्मक गतिविधि -

* एक किरण (कविता) को याद करके कक्षा के साथ सुनाइए

कविता वचन गतिविधि के द्वारा विद्यार्थियों ने अपनी कविता को सुनाया एवं समझा कि सूरज की किरणें आती हैं तो पृथ्वी खिल उठती है। कविता के द्वारा कौशल का विकास हुआ।

रचनात्मक गतिविधि -

* सूरज का चित्र बनाइए

विद्यार्थियों ने सूरज का चित्र बनाकर सूरज की महिमा व गतिविधि द्वारा विद्यार्थियों के रचनात्मक कौशल का विकास हुआ।

MATHS

Activity- Place Value caterpillar

About this activity- In this activity students have made a caterpillar with the help of given information.

The Place Value Caterpillar is a visual representation where each segment of the caterpillar represents a place value position (ones, tens, hundreds, etc.). Each segment contains a digit, and when the segments are combined, they create a multi-digit number. The caterpillar helps students see how the value of each digit changes as it moves from right to left.

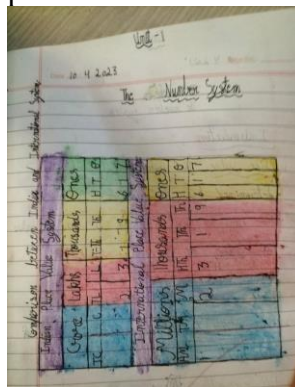

Activity – Addition with Base 10 blocks

In the "Addition with Base 10 Blocks" activity for 3rd grade, students use base 10 blocks to

Activity – Color the place value.

About the activity- In this activity the participants visualize and understand place values, enhancing their ability to read, write, and compare numbers. This visually demonstrates the concept of place value. They should color the box according to their assigned place value.

Activity – Place Value Strip

About the activity- The activity fostered engagement and collaborative learning, with students actively participating and helping each other understand complex place value concepts.

Activity- Indian and international system with paper glasses.

About the activity- This is an engaging and hands-on approach to teaching the differences between the Indian and International number systems using paper glasses. This method enhances students' ability to visualize and understand place values, making it easier to read, write, and compare large numbers in both systems.

Activity- Collect the data of at least five countries' population of last year and express the words according to Indian and International system.

About the activity- These figures provide a clear representation of how large numbers are expressed differently in the Indian and International number systems, aiding in the understanding of place value and notation across different systems.

visually and physically represent and solve addition problems. Each student receives a set of blocks, including units (ones), rods (tens), and flats (hundreds). The teacher presents an additional problem, and students build the corresponding numbers using their blocks. They then combine the blocks to find the sum, grouping and regrouping as necessary. This hands-on activity helps students understand the concept of place value and the mechanics of addition, making abstract concepts more concrete and comprehensible.

By mastering place value concepts through this hands-on activity, students are now better prepared to tackle larger numbers and more complex mathematical operations with confidence. Keep up the good work and continue practicing, becoming even more proficient in place value.

Population of India and Neighbouring Countries

| Country Name | Population |
|--------------|--------------|
| India | 1,40,50,50,7 |
| Pakistan | 22,87,96,6 |
| Nepal | 3,00,98,32 |

EVS

Life Cycle of a Plant

In this activity, students will explore the life cycle of a plant through hands-on learning. They will plant seeds in small pots, observe and record their growth over several weeks, and discuss the stages from seed germination to maturity. Through drawing and labeling diagrams, students will learn about the key phases: seed, sprout, seedling, and adult plant, and understand the role of sunlight, water, and soil in plant development.

EARTH DAY

Enhanced engagement and motivation: Hands-on activities can make learning more enjoyable and exciting for students, increasing their engagement and motivation.

MODEL ON HUMAN DIGESTIVE SYSTEM

In this hands-on activity students will create a model of the human digestive system using clay, colored paper, or other materials. They assemble and label parts like the esophagus, stomach, intestines, and so on, to understand the digestive process. This project reinforces their knowledge of human anatomy, making learning both interactive and memorable through a visual and tactile experience.

Earth Day Celebration

For Earth Day celebration in 3rd grade, students participate in a variety of activities focused on environmental awareness and sustainability. The day begins with a short presentation about the importance of Earth Day and ways to protect our planet. Students then engage in hands-on activities such as planting saplings in the school garden, creating posters about recycling and conservation, and crafting art projects using recycled materials. They also participate in a nature walk around the school grounds, observing and noting local flora and fauna. The celebration concludes with a discussion on how they can implement eco-friendly practices in their daily lives, fostering a sense of responsibility and stewardship for the environment.

SPORE FORMATION

In order to understand the spore formation or fungus growth on bread. Students did the experiential activity that was carried out in class for 7 days to observe the formation of spores.

GERMINATION OF SEED

Students enjoyed the activity of sprout growing in the classroom. To understand the growth of seed or germination of seed, this activity gave better understanding to the students.

VISUAL ART

Topic Paper craft + Earth Day Activity

The student will be able to present an activity.

Material - Paper sheet, fevicol

Topic Paper craft (card making)

The student will be able to present an activity.

Material - Paper sheet, fevicol

Topic - Origami Paper craft (Ear

The student will be able to present an activity.

Material - Paper sheet, fevicol
